

RUTURAJ NIKAM

+91 8600598191 | ruturajnikam1010@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer specializing in **MERN, REST APIs, real-time systems, authentication, and database engineering**. Experienced in building and deploying end-to-end applications with **React.js, Node.js, Express.js, and MongoDB**, including API design, Socket.io communication, third-party integrations, secure backend services, and responsive interfaces.

EDUCATION

D.Y. Patil College of Engineering and Technology

B.Tech in Computer Science (AI & Machine Learning)

Kolhapur, India

Aug 2022 – May 2026

- **CGPA: 8.2** — Relevant Coursework: Data Structures, Algorithms, DBMS, OOP, OS, Computer Networks

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT, Socket.io, Middleware, API Validation

Databases: MongoDB, MySQL, Prisma, Database Indexing

DevOps/Cloud: Docker, AWS EC2, CI/CD, Linux

Tools: Git, GitHub, Postman, Vercel, Render, Visual Studio Code

EXPERIENCE

Full Stack Software Developer Intern

Jan 2026 – Jun 2026

Envision Pvt. Ltd.

Remote

- Delivered **8+ full-stack features** for business workflows using React.js, Node.js, Express.js, and MongoDB, translating functional requirements into responsive interfaces and connected backend functionality.
- Implemented **15+ REST APIs** with request validation, authentication, business logic, MongoDB queries, and structured error handling to support application workflows and frontend integration.
- Resolved frontend-backend issues by tracing **API requests, payloads, business logic, and database operations**, fixing data-flow defects and improving reusable React components.

PROJECTS

Zovia — Real-Time Ride Sharing | MERN, Socket.io, JWT, Leaflet | [Live](#) | [GitHub](#)

Nov 2025 – Dec 2025

- Delivered a real-time ride-sharing platform supporting **2 user roles**, with automated driver dispatch, MongoDB geospatial matching, fare estimation, OTP verification, live location tracking, cancellation, and trip completion.
- Orchestrated Socket.io event flows across **6+ real-time ride events**, covering driver availability, ride requests, acceptance, location updates, status changes, and cancellation with JWT-based role authorization.
- Integrated **Leaflet, OpenRouteService, and MongoDB geospatial queries** for route mapping and driver discovery, while implementing a **5-state ride lifecycle**, paginated history, and participant-level trip authorization.

Email-Driven Leave Management System | Node.js, Express.js, MongoDB, IMAP | [Live](#) | [GitHub](#)

Aug 2025

- Automated leave processing through **IMAP email ingestion**, converting employee requests into structured submission, approval, and tracking workflows and reducing manual processing steps by approximately **70%**.
- Optimized MongoDB access with **compound indexes** for frequently queried leave records, reducing measured query execution overhead by approximately **35%** during application testing.
- Hardened backend services with HTTP-only cookies, Helmet, CORS policies, and IP-based **rate limiting**, protecting authentication and API endpoints.

Movies+More | React.js, Redux Toolkit, TMDB API | [Live](#) | [GitHub](#)

Oct 2024 – Nov 2024

- Created a React movie discovery application integrating the TMDB API with Redux Toolkit for search, filtering, pagination, and browsing across **10k+ titles**.
- Structured asynchronous API state management with Redux Thunks and applied route-based code splitting and lazy loading across primary application views.

ACHIEVEMENTS

285+ LeetCode Problems: Solved problems across Data Structures and Algorithms, including arrays, trees, graphs, and greedy techniques.

Runner-Up – QHackathon: Presented a software solution under competitive hackathon constraints.

Microsoft Learn Student Ambassador: Organized technical learning initiatives and developer sessions for **200+ students**.
